Remote · Hybrid · Open to relocation

SUMMARY

Backend developer with over a year of experience building REST APIs and business logic with Python and FastAPI. Experienced with PostgreSQL, Redis, task queues, and unit and integration testing.

Hands-on experience deploying and supporting production services with Docker, CI/CD, metrics, logs, and distributed tracing. Independently built and maintain Kantano, a production task management service for teams.

EXPERIENCE

Backend Developer - Overleng-IT LLC

May 2025 - June 2026

Automated academic paper compliance service · Python, FastAPI, PostgreSQL, Redis, RabbitMQ, Celery

- Developed REST APIs and business logic for an automated service that checked theses and term papers against GOST requirements.
- Designed PostgreSQL data models and implemented queries with SQLAlchemy.
- Developed and debugged background jobs with Celery and RabbitMQ; used Grafana to monitor and troubleshoot services.
- Set up generation of a typed TypeScript client from OpenAPI to keep backend and frontend contracts in sync.
- Wrote unit and integration tests with pytest using an isolated test database; maintained the Docker environment and CI/CD, and participated in code reviews.

PROJECTS

Kantano - Kanban Task Manager

kantano.ru | github.com/Ilm1n/Kantano

Python · FastAPI · PostgreSQL · Redis · RabbitMQ · Celery · Docker · Vue 3 · TypeScript

- Independently designed, developed, and launched a collaborative Kanban application; the project is running in production.
- Implemented email-verified registration, JWT and OAuth authentication, roles and invitations, real-time board updates over WebSocket, and presence indicators.
- Set up background email delivery with RabbitMQ and Celery and user file storage in S3.
- Added Redis caching: repeated board loads require 4 SQL queries instead of 10.
- Covered key backend workflows with 240 pytest tests; configured linting, type checking, and TypeScript client generation from OpenAPI.
- Maintain the project in production and set up CI/CD, Grafana Stack metrics, logs and traces, Sentry error tracking, and automated database backups to S3.

SKILLS

Backend: Python, FastAPI, asyncio, SQLAlchemy, Pydantic, REST APIs, WebSocket, pytest, Ruff

Data & Messaging: PostgreSQL, Redis, RabbitMQ, Celery, Alembic

Infrastructure: Docker, Docker Compose, GitHub Actions, Caddy, Nginx, Linux, Git, S3

Observability: Grafana Stack (metrics, logs, traces), OpenTelemetry, Sentry

Additional: Vue 3, TypeScript, Django (basic), LLM & AI tools: LangChain, LLM API integration, tool calling, OpenAI Codex, Claude Code

EDUCATION

Academy of Urban Environment Management, Urban Planning and Printing

2026

Diploma in Information Systems and Programming (09.02.07) · Secondary vocational education

LANGUAGES

Russian - Native · English - B2 (technical communication and documentation)
